

Visiting associate & lecturer
Caltech
1200 East California Blvd
Pasadena, CA. 91125
jbreckin@caltech.edu
626-318-0339

Adjunct Professor
Optical sciences
College of Optical Sciences
University of Arizona
1630 East University Blvd.
Tucson, AZ. 85721-0094
jbreckin@optics.arizona.edu

EDUCATION -

- Ph.D. and MSc, Optical Sciences, College of Optical Sciences, University of Arizona, Tucson
 - PhD. Dissertation: Coherence Interferometer and Astronomical Applications
 - MSc. Thesis: Polarization and Image-Forming Properties of a Large Grating Spectrograph
- B.Sc., Physics, Case Institute of Technology (now Case Western Reserve University), Cleveland, Ohio.
- Wharton School, Univ. of PA. - Executive Management training

CAREER -

2010 to current -

- NASA Principal Investigator for: \$569K peer-review selected research grant: *Threshold raw retrieved contrast in coronagraphs is limited by internal polarization* NASA # NNX17AB29G, 2017=>2019
- Member NASA WFIRST-CGI mission science definition team (2012-2015)
- Consultant in optical systems engineering, Northrop Grumman
- NSF, NASA and DoD science and technology review panel service
- Books written: **Basic Optics for the Astronomical Sciences**,
- Associate editor, Applied Optics (1988-1994 & 2011-2015)
- Associate editor, Journal of Ast. Telescopes & Instrument Systems (JATIS) [2013-current]
- Program chair for SPIE's Astronomical Telescopes and Instruments conferences 2021, 2018, 2016, 2014, 2012, 2010, 2008, 2006, 2004
- Faculty Visiting Associate & Lecturer, California Institute of Technology – teach Optical System Engineering and mentor students on the AAReST cube-sat space flight project.
- Adjunct Professor, College of Optical Sciences, University of Arizona, Tucson – annual short course on space optics

1976 to 2010: NASA Jet Propulsion Laboratory (JPL) of CALTECH

- 2008 - 2010: Optics Technologist
- 2004 – 2007: Chief Technologist, NASA Navigator Program
 - Responsible for advanced technology for the detection and characterization of exo-planetary systems using space telescopes: Large mirror space telescopes, interferometers, innovative optical systems, coronagraphs, and imaging spectrometers.
 - Member of the NASA technology strategic planning group
- 2002 – 2003 Technologist, Astronomy & Physics Division, NASA HQ – Washington DC.

- Advanced technology planning & prioritization for the next generation NASA telescopes and instruments.
 - 1999 to 2003 National Science Foundation (NSF) Washington DC. Interagency Personnel Agreement (IPA) transfer from NASA to NSF. Director for Advanced Instruments & Technology (ATI), and Program Manager for National Radio Astronomy Observatory (NRAO).
- Advanced Technology and Instruments:
 - Set research program agenda, goals and objectives and prepared call for proposals and managed the selection process.
 - Managed \$15M/year program in grants – assembled panels of experts, managed debate, selected winners and prepared justification papers.
 - Created a joint AFOSR and NSF research program (\$4M/yr) to use Air Force adaptive optics facilities for scientific research and managed the grants program.
- National Radio Astronomy Observatory:
 - Managed the NSF NRAO technical, scientific and administrative contract with Associated Universities Inc. (\$40M/yr budget). Represented US government and the National Science Board in proposal negotiation for new research instruments and facilities.
 - 1995 to 1999: JPL - Technical Program Manager: Innovative Imaging Systems for defense department applications.
- Business development lead for JPL's innovative optical and infrared sensor systems.
- Led studies of large aperture segmented space telescopes and sparse aperture telescopes: their design, construction and applications.
- Led interagency large optics working group (LOWG) for the Dod/NASA/DOE space technology alliance.
- 1980 to 1994: Line technical manager, Optical sciences and applications section.
- Recruited and hired > 40 optical scientists, proposed The JPL Optics Initiative (1981), received \$4,000K and successfully created a capability for optical system design, engineering, and supporting optical science research at JPL in support of flight hardware for remote sensing applications. Responsible for 70 to 90 engineers and delivering space flight hardware to support the NASA science and engineering communities. Imaging spectrometers, cameras and interferometers were the hardware products of the Section. Delivered the optical systems for Cassini, Galileo and the ATMOS missions.
- NASA HQ. Hubble failure board – Technical advisor to the chairman: Dr. Lew Allen.
- Managed the section responsible for the repair of the optical system on the Hubble Space Telescope.
- Led the NASA optics-working group to exchange optical sciences and technical information across NASA centers in support of NASA missions.
- Led the NASA team to investigate, summarize status and recommend action to the Agency on how to utilize Russian remote sensing optical science and technology. Led 5 NASA teams to institutes in St. Petersburg, Moscow, Podolsk, and Troitsk, Russia (1992-95)
- Instrument scientist responsible for the optical design and engineering of the

ATMOS system for the Space Shuttle. ATMOS is a 1- meter path difference Fourier transform spectrometer space-flight hardware system that made 3 successful shuttle flights.

- 1976 to 1979: Senior Scientist, Space Science Division
 - Responsible for personal research programs in the optical sciences and astrophysics. Published original papers in physical optics, interferometry, spectroscopy and instruments.
- 1977 to 1983: Instrument Scientist and science co-investigator for the ATMOS space flight instrument system on board Space Lab 1 and 3.

1979 – 86, 1988-92, 1995-1998, 2005-06, 2009-current:

California Institute of Technology academic faculty, Applied Physics department and Graduate Aeronautical Laboratories (GALCIT)

- Developed material and wrote textbook for a two-quarter class in optical system engineering, a graduate course in optical design, optical systems engineering and image formation. Class size range from 3 to 20 students.

1966 to 1976:

- Research Assistant, Kitt Peak National Observatory
- Spectroscopy, physical optics, atmospheric optics and astronomical research. Design, construction and applications of a coherence interferometer for spatial analysis of solar and features and optical computer processing.
- Graduate Student, College of Optical Sciences, University of Arizona, Tucson.

1964 to 1966: Electron-Tube engineer, Rauland Corporation of Zenith Radio, Chicago, IL.

- Electron optics design, photocathode preparation and characterization of electrostatically focused high quantum efficiency image intensifier tubes for biomedical and military applications.

1961 to 1964:

Research Assistant. Lick Observatory, University of California. Six color photoelectric photometry and development of an electronographic image converter tube.

Professional Honors & Awards –

- 2005 – 2010: Elected chair and led the Large Optics Working Group (LOWG) of the Space Technology Alliance (STA) – {a subcommittee of the Federal agencies' Technology Alliance (NRO & NASA & DOE & DOD)}
- 2003 George W. Goddard Award and Prize. (Awarded by the International Society for Optical Engineering for outstanding innovative optical systems for space-based telescopes & instruments).
- 1999 Elected: United States Chair International Commission for Optics (ICO), an IUPAP organization of the National Academy of Science. Represent US optics research and technology interests to the international optics community and assessment of the international status of US optical sciences.
- 2001 Elected: Fellow, American Association for the Advancement of Science (AAAS)
- 1996 Elected: Executive Board, Council of Scientific Society Presidents (CSSP)
 - Participated in National Academy of Science meetings and legislative meetings to advocate National support for the priority of science and technical education and research in the US.

- 1994 Elected: President, International Society for Optical Engineering (SPIE).
- 1993 Hubble Space Telescope NASA failure review board –
 - Led the technical section responsible for the optical repair
- 1988 Elected to Board of Governors of the International Society for Optical Engineering.
- 1985 Elected: Fellow, Optical Society of America (OSA) and Royal Astronomical Society of London (RAS) and the International Society for Optical Engineering (SPIE).
- 1984 Elected to Board of Directors of the Optical Society of America.
- 1974 Elected member of the International Astronomical Union (IAU)
- Six patents for innovative optical systems for astrophysics and earth science
- Eight NASA achievement and leadership awards
- Huntington Foundation four-year undergraduate scholarship

NASA Space-Flight Science roles:

- WFIRST-AFTA science & technology definition team
- ATMOS - Instrument Scientist & Science Co-investigator
- Space Interferometer Mission (SIM) – Technology Advisory Committee
- NASA failure review board for Hubble Space Telescope
- Wide Field Planetary Camera for HST-Optics repair

Patents

- Disclosure to the NSF for Coherence Interferometer (1974)
- U.S. Patent No. 4,243,323, Jan. 6, 1981, for Chevron Beamsplitter Interferometer
- U.S. Patent No. 4,278,351, July 15, 1981, for a tilt-compensated, 1-meter OPD Fourier Transform Spectrometer – The ATMOS space-flight Interferometer
- U.S. Patent No. 4,497,540, Jan. 15, 1985, for Shuttle Imaging Spectrometer
- U.S. Patent No. 4,523,846, June 17, 1985, for an Electronically Scanned Fourier Transform Spectrometer
- **Book Chapter:**
- First Order Optical Design for Fourier Spectrometers, pages 64 to 125, book chapter in Spectrometric Techniques Volume 2, Ed. By George Vanasse, Academic Press, 1981, ISBN number 0-12-710402-X.

Book single author:

- Basic Optics for the Astronomical Sciences, 2012, International Society for Optical Engineering, ~ (400 page textbook), ISBN# 9780819483669
- With stars in their eyes, The extraordinary Lives and Enduring Genius of Aden and Marjorie Meinel. 2021, Oxford University Press; with Alec M. Pridgeon (500 page biography)

MSc Thesis

J. B. Breckinridge, "Polarization and Image-Forming Properties of a Large Grating Spectrograph." Thesis. Optical Sciences Center, University of Arizona. Technical Report No. 56, 66 pages, June 15, 1970.

PhD Dissertation

J. B. Breckinridge PhD. Dissertation: Coherence Interferometer and Astronomical Applications, PhD Dissertation, College of Optical Sciences, University of Arizona, Tucson, AZ., September, 1976

All published papers: program committee peer-reviewed journals & proceedings papers plus blind peer-review papers.
Blind peer-review papers are shown below in italics.
